## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to determining the pattern center of a fingerprint pattern, classified in class 382, subclass 291.
  - II. Claims 15-28, drawn to determining the pattern orientation of a fingerprint pattern, classified in class 382, subclass 125.
  - III. Claims 29-37, 50-53, drawn to aligning two fingerprint pattern, classified in class 382, subclass 294.
  - IV. Claims 38-49, drawn to verifying a fingerprint pattern, classified in class 382, subclass 124.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as determining the center of a fingerprint pattern. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as determining the center of a fingerprint pattern. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, the search required for Group II is not
